OTHER SKILLS

- Sass
- Bootstrap
- Webpack
- Gatsby.js
- Mongoose ORM
- REST API

WORK EXPERIENCE

P-SPOT: PARKING APP

Parking App for a startup. As CTO, I was responsible for overall product requirement & development. It is build with React Native, Node.js, MongoDB & Google Cloud APIs.

ADALGO DIGITAL   Visit

Responsive business website for "Adalgo Digital" - a digital marketing company. Single page site, build with Bootstrap, Sass & Webpack.

HARDIWAR CAB SERVICE   Visit

Static responsive website for tour & travel business in Haridwar. It's a multipage website developed using Webpack, Sass & Bootstrap.

PERSONAL PROJECTS

FANFIC ARENA   Github   Live Project

An online platform for people who love to read, write and explore fan fictions. Frontend is build with React, Redux & Styled Components. Implemented REST API using Node.js, Express & MongoDB.

URL SHORTENER   Github   Live Project

A fast and simple online tool for converting long, ugly URLs and links into more manageable short URLs. This project is the implementation of the URL shortener system design in nodejs and mongodb.

HOTEL MONTSERRAT   Github   Live Project

A mockup website featuring qualities and services offered by the hotel. It is focused on using webpack bundler and learning the core concepts that are required before learning a framework.
